

DevIncept SDS Guide

- DevIncept is an Open Source organisation started by developers for developers!
- Founded in August 2020 with a mission to make technical education free to all students.
- We believe in the Project-Based Learning approach, which is one of the best techniques to learn a new technical skill.
- We offer one of the best technical training programs in the market for FREE!
- At DevIncept, It's all about Open-Source!!

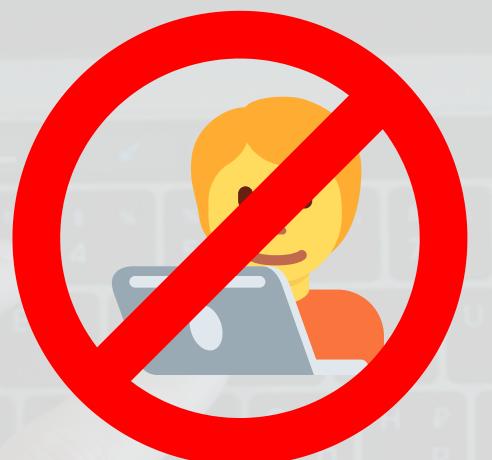

PROBLEMS FACED BY STUDENT DEVELOPERS

These problems might sound common but this is where we go wrong!

No Group-Based Development

Projects are built individually without collaborating with peers which affect your brainstorming/creativity skills!

No Real-Time Development on Github

Students enrol in a lot of courses that teach them tech concepts but what about real-time development on github?

Growing Technically without a Mentor

Technical Concepts can be learned from anywhere but what about proper guidance from mentors?

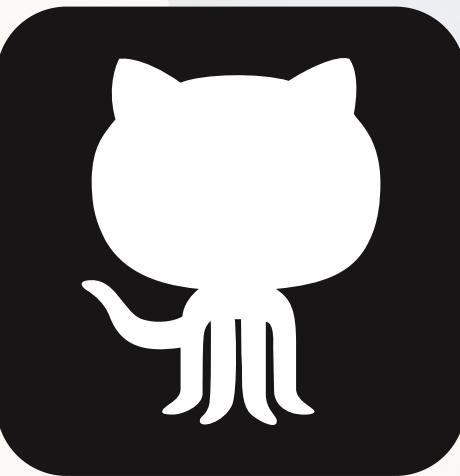

DEVINCEPT IS THE SOLUTION

DevIncept solves some of the most pressing problems which can make you a kickass developer who learns via developing & implementing your code in real world.

Group-Based Learning is the best

A group of students work together in a series of activities in order to achieve a shared learning objective.

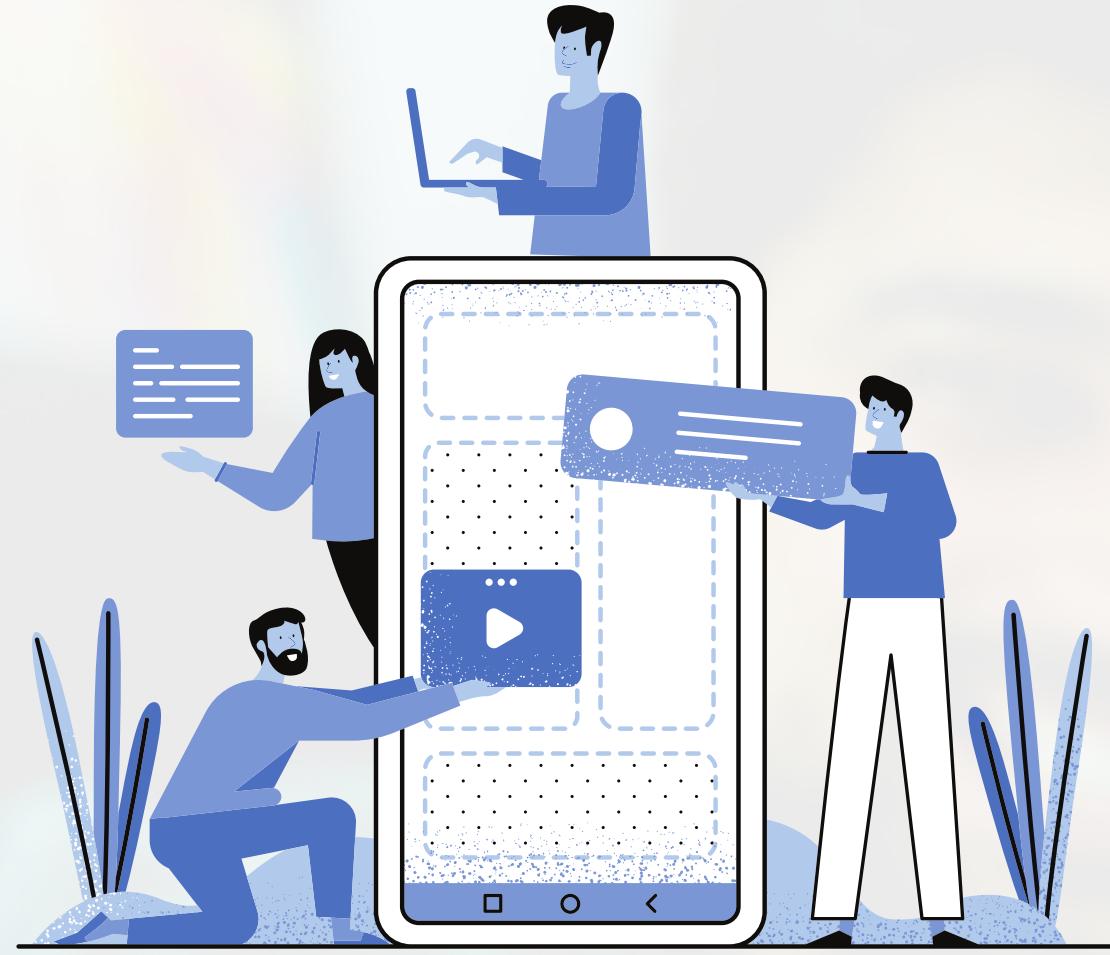

Real-Time Development on Github

Students will work on real-time open source projects by implementing technical concepts they learnt!

Grow yourself with a Technical Mentor

Mentors will be at your support to help you with the courses, programs we bring for our community!

DevIncept.

Three Important Aspects
of our FREE Training
Programs for students

01

Github Resources Provided

We mainly use GitHub for providing study materials to students for learning, there are a lot of technical projects hosted & explained on GitHub which are included in our learning modules so the student can learn by developing & collaborating with others!

02

Our Slack Community (1000+)

Our whole team which consists of Program Managers, Community Managers, Mentors are active on slack to help, guide & motivate our student developer community who are a part of DevIncept.

03

Competition Culture is Evergreen here

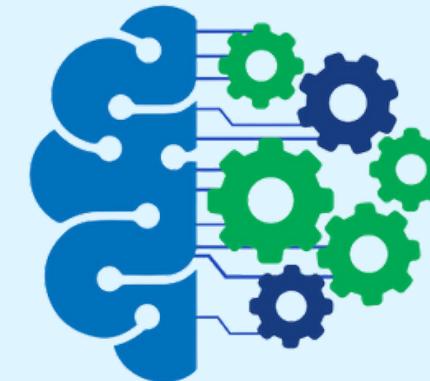

We host competitions on various platforms like Coding Competitions, Blog Competitions or Contribution Programs which gives students a chance to compete, upgrade themselves, gives them the power to think & innovate stuff!

04

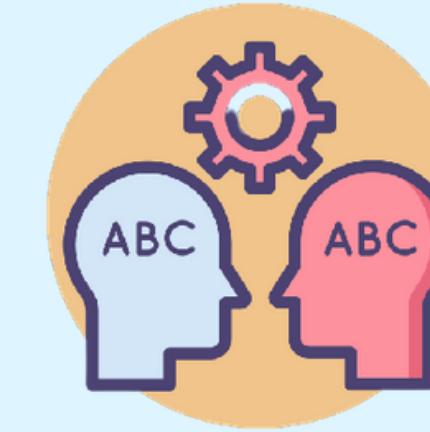

Enrol in our Free Courses

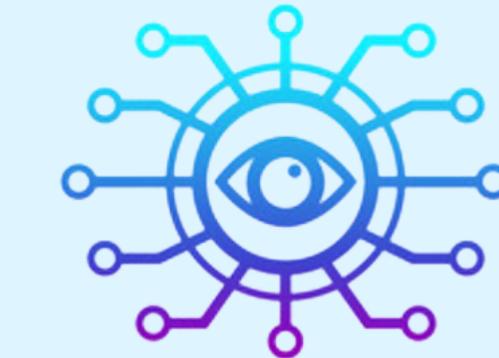

Python

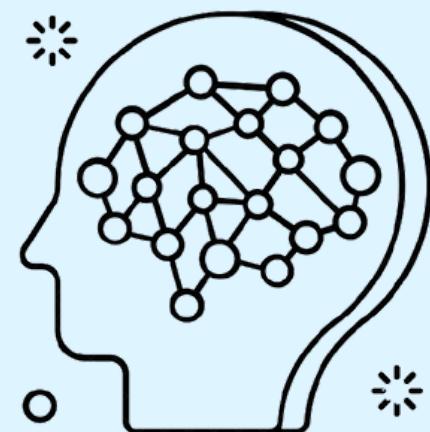

ML

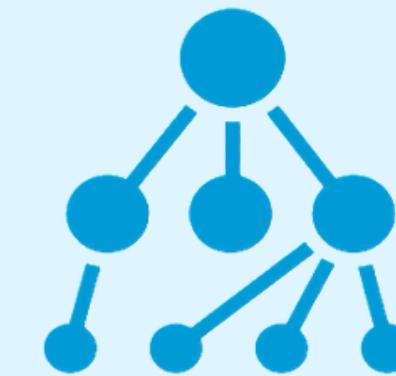

NLP

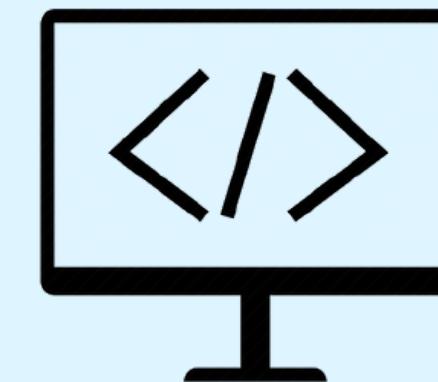

Open CV

Deep Learning

DSA

Web Development

Android Development

Participate | Compete | Upgrade

Blog Competitions

Online Webinars

Contribution Programs

Interactive Learning is also a part of DevIncept - Training Curriculums

WHY CHOOSE DEVINCEPT?

Learn in-demand skills by
implementing for FREE

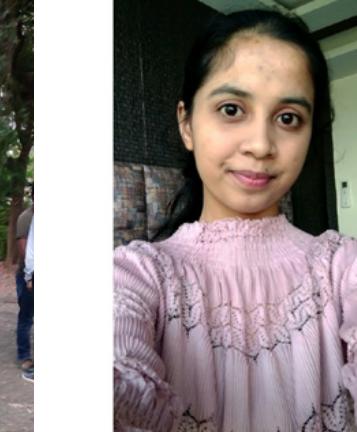

Compete with other participants in
weekly project-based assignments

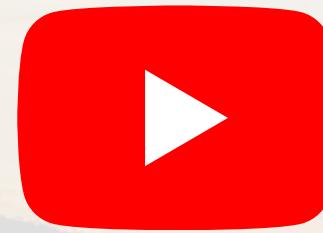

Show your skills & Get a chance
to Intern with DevIncept

Meet our Community

One of the key elements behind the success of DevIncept
